

SpaceLocker

Welcome to Orbit

Enhanced, Safe And Universal Payload Hosting.

Embark on the secondary payload hosting adventure thanks to our brokering services and interface technology!

WHY HOST SECONDARY PAYLOADS WITH US

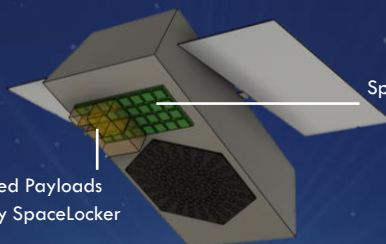

Payload hosting is the opportunity of **financial income and strategic partnerships**. With SpaceLocker, it is also:

- **Simple:** We ensure easy integration and operation of the payloads. Plus, one SpaceLocker interface can host multiple payloads at once, without added complexity.
- **Time-efficient:** Focus on your core expertise, leave the payload hosting intricacies to us.
- **Profitable:** Add a new revenue stream to your mission, improving its financials or simply making it feasible.
- **Reliable:** Our interface is secure, isolated and removable so that payloads cannot threaten the safety of your satellite.
- **Universal:** Our modular interface can host any payload, including new markets.
- **Repeatable:** Keep your platform identical regardless of the payloads, thanks to our standardized interface.

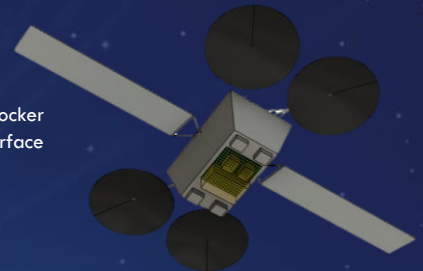

Applies to:

Earth Observation Satellites

Constellations

Geostationary Satellites
